La Chronique

www.alouettelama.com is functional !

Longueuil, QC, Canada, le January 1st, 2005. New www.alouettelama.com website is functional since 0h00 (Paris local time). It follows on experience gained with previous free website established on www.geocities.com. Not less than 11 734 visitors passed via this portal in order to get prime information about Alouette and Lama helicopters since August, 2000, sothat we can qualify this as a success.

The ambition with this new website is to expand available information, to maintain a high content quality level as well as to improve the general aspect and links between all pages.

We also would like to see this website accessible to everybody everywhere regardless of connection speed. By the way, a lot of documents are presented in PDF format in order to print them easily.

New sections should appear during the coming weeks. On the other hand some older pages will be updated and expanded.

So, visit us regularly !
